

DETERMINISTIC WORLD

firewall · signature · the SQL fix

EXACT RULE
IP in range?
signature valid?

the boundary
does NOT move

"ignore all previous
instructions"
-> BLOCK

"disregard everything
above"
-> ALLOW (!)

PROBABILISTIC WORLD

a language model

WEIGHS MEANING
no exact edges

the boundary MOVES
with the wording

"ignore..."
-> refused

"disregard..."
-> maybe refused,
maybe not

a firewall NEVER "generally" blocks a port.
a model only "usually" refuses.
